DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/28/2005 has been entered.

In response to the amendment filed on 12/19/2005, all the amendments have been entered and the action follows:

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of

35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Distinguishing photographs and graphics on the world wide web, by Athitsos, IEEE 1997 in view of Fukuda et al (US 5867593).

With respect to claim 1, Athitsos discloses a photograph and graphic distinguishing method that train a model using the different values of the images (see page 11, col. 1, lines 2-9, lines 13-19, col. 2, lines 4-8, the photographs and graphics are read as natural and artificial or slide and comic images), the training is done per the color and the amount of noise (see page 11 col. 2 first paragraph) as claimed. Furthermore, Athitsos also discloses the feature vector as the edge feature of the image, (see page 12 section 4 image metrics, and page 11 column 2, last paragraph, wherein the edge contours between the regions are considered as the distinctions in the images) as claimed in the other independent claims. However, he fails to disclose calculating a difference between the first and second image to get a noise feature vector to use that for training the model, as claimed. Fukuda teaches calculating a difference between the first and second image to get a noise feature vector to use that for training the model, (see Abstract the horizontal and the vertical difference is obtained that is use for the purpose of discrimination of the image blocks) as claimed.

Therefore, it would have been obvious to one ordinary skilled in the art at the time of invention to simply combine the two references as they are analogous

because they are solving similar problem of image classification. The teaching of Fukuda can be incorporated in to the Athitsos's system of image classification in order to provide a system that discriminates the image.

With respect to claims 3-5 as best understood, the median filter, the gaussian filter and the Wiener filter is well known in order to reduce the noise in the signal.

With respect to claim 6, Fukuda further teaches the video stream of data, (see col. 5, lines 40-42, image picked up by video camera) as claimed.

Claims 7-8, 10-12, 14-15, 18, 20-22, 24-25, 30-31, 33-34, 37-38, 40-41, 43-46, 48-49, 51-52, 55-56, 58, and 60-62 are rejected for the same reasons as set forth in the rejection of claims 1-6, because claims 7-8, 10-12, 14-15, 18, 20-22, 24-25, 30-31, 33-34, 37-38, 40-41, 43-46, 48-49, 51-52, 55-56, 58, and 60-62 are claiming subject matter that is in some what similar to as claimed in claims 1-6.
